The Restaurant Control Center is now accessible on web and mobile devices.

Restaurant Control Center

Chowly's Restaurant Control Center consolidates digital ordering data for comprehensive visibility into your restaurant's order history. Gain insights to spot trends, make informed decisions, and seize new opportunities.

Data

A Single Source of Truth for All Your Online Orders

- Consolidate order data for both pickup and delivery in a unified platform.
- Efficiently detect errors and potential roadblocks.
- Analyze order cancellations, average basket size by location, and other key metrics.
- Evaluate sales performance across various platforms, locations, and dates.

Sales Reporting

Optimize Your Sales Mix and Revenue

- Identify and monitor top-selling items, and reassess others for optimal success.
- Assess how well ordering platforms align with your revenue goals, identifying contributors and areas for improvement.
- Analyze and monitor sales trends across specific dates to make informed decisions.

Controls

A Single Source of Truth for All Your Online Orders

- Effortlessly preview each menu with a few clicks.
- Customize upcharges based on location or third-party ordering platform.
- Pause/unpause ordering platforms to react to conditions of individual locations.
- Instantly update and synchronize your POS menu with delivery channels as needed.
