

Chowly + Revel POS Integration

Streamlining Restaurant Operations for Increased Profitability

Chowly integrates delivery platforms into Revel POS, streamlining operations and letting restaurants focus on what they do best: providing excellent food and service.

Key Benefits

Elevated Online Ordering Experience

The integration with Revel POS syncs delivery orders automatically, reducing manual data entry and enhancing order accuracy.

Dynamic Pricing

Chowly's Smart Pricing adapts menu prices based on peak times, weather, holidays, and local demand dynamics.

Swift and Real-time Updates

From menu changes to item availability, any edits made on Revel reflect twice daily on Chowly's platform, ensuring all delivery platforms have accurate and up-to-date menu information.

Focus on SMB Operators

With minimal hardware requirements, it's an easy solution ensuring SMB operators can get started right away.

Why Chowly with Revel?

Top-notch Support:

Chowly's dedicated customer support team ensures that you and your clients receive the assistance needed promptly.

Unique Third-party Integrations:

Chowly's ability to integrate other TOOS is a game changer. Chowly supports 150+ third-party platforms, including those specific to certain regions.

Restaurant Control Center (RCC):

Simplify your reporting and reconciliation with RCC, providing accurate net dollar figures, ensuring transparency in your financials.

Partnership and Referrals:

Our internal referral system ensures prompt acknowledgment and facilitates smooth lead-sharing between Revel and Chowly.

Training and Support:

Our team provides training sessions to alleviate challenges, enhance efficiency, and boost revenue.

Scalability:

Whether expanding to new locations or managing seasonal demand fluctuations, the integration adapts to changing business needs effortlessly.
